

Complete Digital Signage Solution

Effortlessly deliver better, more engaging content to your audience with a fully-integrated Digital Signage solution for indoor and outdoor public spaces. LED BY US is your all-in-one strategic solution partner for providing the best customer experience for your digital signage applications.

Differentiate your business
With high-impact multimedia

LED BY US Digital Signage Solution is ideal for businesses, schools, and organizations that require dynamic display of information. With an intuitive interface, users can effortlessly manage, group, and schedule content. The platform boasts a vast template library that helps users to create professional-looking content that grabs attention.

Furthermore, the solution supports single displays, multiple displays, and video walls, making it extremely flexible. It also works with multiple media players and locations, which is suitable for businesses with various offices or locations.

LEDByUs Digital Signage Solution prioritizes security by using SSL/HTTPS encryption, serverless hosting, and DDOS protection to ensure that the content is always available. Powered by Google Cloud, the solution offers high-performance usage even during periods of heavy use, making it an exceptional choice for businesses seeking a dynamic and engaging way to display information.

Simple Plug & Play Solution

Seamless Integrations

Features

Ready-Made Templates

Use the template library to select from professionally designed templates, which can be edited to make it your own

Unlimited Storage

Unlimited storage for all your content without any additional charges

Offline Operation

Never be caught on the back-foot with embarrassing offline screensavers bouncing around on your screens

Playlists

Create as many content playlists as you like. Playlists can be assigned to a single display or to a group of displays.

Layouts

Split your screen into multiple layers, use the pre-defined layouts or customise your own.

Power Management

Control and schedule your displays to turn off/on at a specific date/time to save resources.
